

' Task #2 COMPLETE: Admin Mockup Manager (Built from scratch)

- New DB table: mockups — id, name, description, productId, productName, imageUrl, thumbUrl, tags, isActive, sortOrder
- Migration 0017_mockups.sql applied to production PostgreSQL DB
- 5 new API routes registered at /api/admin/mockups:

GET /api/admin/mockups?q=&productId=&active= — list with search/filter

POST /api/admin/mockups — create

PATCH /api/admin/mockups/:id — update any field

DELETE /api/admin/mockups/:id — remove

POST /api/admin/mockups/reorder — drag-to-sort order
- Admin Gallery page at /admin/mockups with full CRUD:
 - Upload via R2 presigned PUT URL (single or multi-file, drag-and-drop zone)
 - Image lightbox on click, inline active toggle, sort up/down arrows
 - Edit modal: name, description, linked product, tags, active status
 - Search + filter by product & status, delete with confirm dialog
- 'Mockup Gallery' nav item added to Content section of Admin sidebar

📄 Files Changed (all 7 pushed to GitHub)

- [NEW]

lib/db/migrations/0017_mockups.sql
- [MOD]

lib/db/src/schema/index.ts — mockupsTable + Mockup types
- [NEW]

artifacts/api-server/src/routes/mockups.ts
- [MOD]

artifacts/api-server/src/routes/index.ts — registers mockupsRouter
- [NEW]

artifacts/trynex-storefront/src/pages/admin/AdminMockups.tsx
- [MOD]

artifacts/trynex-storefront/src/App.tsx — AdminMockups lazy route
- [MOD]

artifacts/trynex-storefront/src/components/layout/AdminLayout.tsx — nav link

' Task #1 (Prior Session): Checkout & Add-to-Cart Fixed

- Removed duplicate payment CTA from sidebar (was floating below order summary)
- Payment gateway step gated: className= step !== 2 ? 'hidden' : "
- handleAddToCart color guard removed — non-color products can now be added to cart
- Build-hash meta tag injected via vite.config.ts for cache-busting

' Verified Working — No Code Change Required

- Order status notifications: createCustomerNotification() fires in updateOrderStatusHandler (orders.ts:122?)
- Checkout form: window.triggerFormValidation properly exposed via useEffect (Checkout.tsx:108-112)
- Design Studio Edit Tools: FAB correctly fixed at bottom-20 right-4 z-40

📄 Build & Deploy Summary

- API server: TypeScript compiled, dist/index.mjs built (3.6 MB)

Storefront: Vite build in 32s, PWA service worker + 119 precached entries

Zero TypeScript errors on both packages

GitHub push: 7 files committed to georgelsmith333-hub/trynex-liestyle [skip ci]

Cloudflare Pages will auto-rebuild from the new commits
